

Shehu Garbai School, Maiduguri – Infrastructure Development Project

In a major step toward improving the learning environment and ensuring safety and hygiene, the **Borno State Education Trust Fund (ETF)** executed a comprehensive infrastructure development project at **Shehu Garbai School, Maiduguri**.

Project Scope

a. Construction of a 2-Storey Classroom Block

- A newly constructed 2-storey building comprising **15 spacious classrooms** to accommodate the growing student population and reduce overcrowding.
- Designed to modern educational standards for comfort, ventilation, and durability.

b. Site Development & Sanitation Enhancements

- **Perimeter fencing** to secure the school premises and enhance student safety.
 - **Full interlocking of the new site**, improving accessibility and creating a cleaner, more organized school environment.
 - Construction of **two (2) blocks of 4-compartment VIP toilets**, promoting hygiene and improving sanitation for both students and staff.
-

Project Impact

- Increased classroom space and reduced student-to-teacher ratio
 - Enhanced safety and controlled access to school grounds
 - Improved sanitation facilities to support health and well-being
 - A more welcoming and structured learning atmosphere
